Customer Profile

Corona Leonis Entertainment is a gaming industry outsourcing studio located on the coastline of British Columbia, Canada.

Situation

Corona Leonis Entertainment needed assistance building an online educational community that would enable its users to learn the art of video game development.

Solution

Corona Leonis Entertainment selected Cre8Object as the company that would be capable of turning their vision into a reality. Cre8Object will be building the Web 2.0 website on the Microsoft .NET 2.0 platform, which will be robust and scalable.

Benefits

- Expertise with the newest Microsoft programming tools and WEB 2.0 technologies
- Dedicated development team
- Flexible financing options

will bear fruit of the finest technical and artistic quality.

Situation

Corona Leonis Entertainment was awarded a grant from the Microsoft Unlimited Potential Program in order to build an educational website. This was largely due to Corona Leonis Entertainment's creative conception of the Locus Community Website, an online educational community that would enable its users to gain knowledge of the art of video game development. Corona Leonis Entertainment required the services of a web development company, who would be able to build the Locus Community Website.

Solution

Corona Leonis Entertainment selected Cre8Object as the company that would be capable of turning their vision into a reality. From the sales process to the development phase to the vision of the Locus Community, Cre8Object aligned themselves with Corona Leonis' needs in order to serve them in the best way possible.

The creativity, ideas and visions proposed by Corona Leonis Entertainment for The Locus Community Website would not be lost due to a technological bottleneck. Cre8Object had the tools, experience and expertise to turn those ideas into something real. Cre8Object will be building the Locus Community Website on the latest .NET programming framework, .NET 2.0. This platform provides the scalability required

for the hosting of thousands and thousands of eventual users, that will form part of the Locus Community for Corona Leonis.

Benefits

Corona Leonis benefits from Cre8Object's concrete experience in developing online communities and all the components encompassed by the proposed Locus Community Website.

From forums to blogs to RSS feeds to tagging, Cre8Object draws from a wide range of previous project experiences. By providing expertise with the newest tools, technologies and concepts, such as advanced controls, user generated content and AJAX, the Locus Community Website reflects a true WEB 2.0 application.

With a dedicated Cre8Object team managing all aspects of The Locus Community Website, Corona Leonis Entertainment can rest assured that no detail will be overlooked.

By offering flexible financing, Cre8Object was able to meet Corona Leonis Entertainment's funding limitations while working within their timeline.
